**CERTIFICATE OF MAILING**

I hereby certify that the documents identified herein are being deposited with the United States Postal Service as first class mail under 37 CFR 1.8(a) in an envelope addressed to: Commissioner for Trademarks, P.O. Box 1451, Alexandria, VA 22313-1451 on the date set forth below

Geraldine MacLellan

Dated: June 30, 2005

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE  
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD**

MISSIONTREK LTD. CO.,

Petitioner

v.

ONFOLIO, INC.,

Registrant.

Cancellation No. 92044538

v.

Reg. No. 2,904,982

07-05-2005

U.S. Patent & TMO/c/TM Mail Rpt Dt. #11

**REGISTRANT'S MOTION FOR SUMMARY JUDGMENT**

Registrant, Onfolio, Inc., ("Registrant"), hereby moves for summary judgment on the ground that, as a matter of law, its registered mark ONFOLIO is not confusingly similar in appearance, sound, meaning or commercial impression to the registered mark CARTAGIO, owned by Petitioner Missiontrek Ltd. Co. ("Petitioner").

Registrant's mark ONFOLIO is registered for "Computer software for capturing, organizing and sharing on-line content" in Class 9, Reg. No. 2,904,982. Petitioner seeks to cancel this registration on the ground of confusing similarity to its mark CARTAGIO, registered for "Computer software, namely internet navigation software, that is, internet browsers; computer hardware in the nature of database and computer management equipment; internet research and cost accounting software; software for hosting computer servers, and user manuals sold as a unit" in Class 9, Reg. No. 2,756,245.

For purposes of this Motion, Registrant will concede the relatedness of its product to Petitioner's product. Thus, the sole ground for this Motion is the significant dissimilarity of the marks themselves.

Petitioner's entire contention as to the marks' alleged similarity is given in Section I of its Petition for Cancellation:

ONFOLIO, the mark Respondent has registered, is similar to CARTAGIO, the mark owned by Petitioner in several respects. First of all, the visual aspect of those two words is the same. They have a similar appearance in that they both begin with round letters (C and O), and end in "IO" and have the same number of letters [*sic*]. Furthermore, regarding the sound of ONFOLIO and CARTAGIO when spoken, the number of syllables is identical, as well as the accent.

As noted, this is Petitioner's entire argument. It contains an obvious error: CARTAGIO and ONFOLIO do not have the same number of letters. The rest of Petitioner's argument is equally fallacious, for the following reasons:

1. The Only Common Element of Petitioner's Marks and Registrant's Mark is the Ordinary English Suffix "-IO" which Appears in Hundreds of Registered Hardware and Software Marks.
- 

The *only* common element of Petitioner's mark CARTAGIO and Registrant's mark ONFOLIO is the suffix "IO;" the marks do not share any other letters. However, "IO" is an ordinary English suffix which appears in literally hundreds of registered hardware/software marks, including marks registered for goods that are identical or similar to those of Petitioner.

The attached Exhibit A consists of a print-out from an online Dictionary. This print-out establishes that "-io" is a common suffix derived from Latin, one of the constituent languages of English.<sup>1</sup> The Dictionary defines "-io" as a "Suffix added to the stem of the perfect passive participle of a verb, to create a verbal noun indicating an action." The attached print-out also establishes that "-io" is a common suffix in Italian, a Romance language derived from Latin. In Italian, "-io" connotes, *inter alia*, "state, condition."

It is therefore not surprising to find hundreds of registered hardware and software marks featuring the suffix "IO." As shown in the attached Exhibit B, a Trademarkscan search

---

<sup>1</sup> As noted *infra*, Petitioner has acknowledged that its mark is similar to "an old Latin name."

conducted on June 21, 2005 yielded over 350 such marks. If one adds published and allowed applications, the total swells to over 450.<sup>2</sup>

In the attached Exhibit C, Registrant has enclosed print-outs from the PTO's TARR system showing a number of these "IO"-suffix registrations. Many of them cover hardware/software goods that are identical or closely related to those covered by Petitioner's registration. Thus, Exhibit C contains, *inter alia*, print-outs of the registered browser marks PROVISIO, INPERIO and PENOKIO; print-outs of the registered database management hardware/software marks CELESIO, PANORATIO, PROTECTIO and RISKFOLIO; and print-outs of the registered server marks ENVIVIO, CAPTIO and KEY2AUDIO.

In short, hardware/software marks ending in "IO" have been registered literally hundreds of times, often for goods that are identical or similar to Petitioner's. Neither Petitioner nor any other maker of hardware and software can monopolize this common suffix.

2. Petitioner's Mark and Registrant's Mark are Dissimilar in Appearance, Sound, Meaning and Commercial Impression

The respective root terms of Petitioner's mark and Registrant's mark, "CARTAG-" and "ONFOL-", and indeed the marks CARTAGIO and ONFOLIO taken as a whole, are overwhelmingly different in appearance, sound, meaning and commercial impression. See *Palm Bay Imports, Inc. v. Veuve Clicquot Ponsardin*, 396 F3d 1369, 1371-72 (CAFC 2005) (the legal test for similarity is based on the marks' appearance, sound, meaning and commercial impression; "commercial impression" is sometimes used as a proxy for the ultimate conclusion

---

<sup>2</sup> The Trademarkscan search was limited to marks covering computer hardware and software goods in Class 9 and did not include marks covering equivalent services, such as providing access to non-downloadable software in Class 42.

of dissimilarity based on appearance, sound and meaning). Accordingly, Petitioner's and Registrant's marks are not confusingly similar.

A. Meaning and Connotation

The attached Exhibit D consists of an excerpt from the PTO file history of Petitioner's registration. This excerpt shows Petitioner's response to an inquiry regarding the English translation of its mark CARTAGIO. In this response, Petitioner made the following statement:

As for the translation of the mark, there is none, in that CARTAGIO has no known meaning, other than its being similar to an old Latin name of the city of Carthage, Tunisia.

Thus, Petitioner has acknowledged that the only meaning or connotation of its mark is a similarity to the "old Latin name of the city of Carthage, Tunisia." Obviously, Registrant's mark ONFOLIO has no such meaning or connotation.

Indeed, Registrant's mark recognizably incorporates the word "FOLIO," which has the very different dictionary meaning of "a leaf of paper..., a leaf-number of a book, a sheet of paper folded once, making two leaves of a book, [or] a book made of such sheets." See the excerpt from *The Concise Oxford Dictionary of Current English* (1991 ed.), attached as Exhibit E. Petitioner's and Registrant's marks are therefore entirely different in meaning and connotation.

B. Appearance

As noted, Petitioner has incorrectly alleged that its mark and Registrant's mark have the same number of letters. They do not; nor are those letters identical. Other than the widely-used suffix "IO," Petitioner's mark consists of the letters C, A, R, T, A, and G, whereas Registrant's mark consists of the letters O, N, F, O, and L.

In short, except for the ordinary suffix, *there are no common letters whatsoever in Petitioner's mark and Registrant mark*. The marks are therefore predominantly different in appearance.<sup>3</sup>

C. Sound

Given their different letters, Petitioner's mark and Registrant's mark are significantly different in pronunciation. To use phonetic spelling, Petitioner's mark is pronounced KAR-TAHJ-EE-O while Registrant's mark is pronounced ON-FOHL-EE-O.

Petitioner argues that its mark and Registrant's mark have the same number of syllables and the same placement of accent. However, this is also true of, e.g., the registered browser marks PROVISIO, INPERIO and PENOKIO; the registered database management hardware/software marks CELESIO, PORTACIO, ACCARDIO, PROTECTIO, RISKFOLIO and HEALTHFOLIO; and other registered marks shown in the attached Exhibit C such as COMPERIO, COMPOSIO, COFICIO, CONSORTIO, COGNITIO and CAMERIO. Registrant is unaware of any cases which hold that the same number of syllables and the same placement of accent are sufficient to create confusion between marks that are otherwise distinguishable. Indeed, the cases discussed in Section E below clearly hold otherwise.

D. Commercial Impression

As noted above, Opposer's and Applicant's marks have entirely different meanings, entirely different letters (other than the ordinary and ubiquitous suffix "-IO") and entirely different pronunciations. For these reasons, the marks are also entirely different in overall commercial impression. Indeed, Applicant's mark is likely to be seen as a novel variant

---

<sup>3</sup> Petitioner argues that the initial "C" of its mark and the initial "O" of Registrant's mark are both "round" letters. Of course, the same is true of Q and G; while round features can also be found in B, D, S and P. "Roundness" does not confer similarity upon letters that are otherwise distinct. In this regard, Registrant notes that C is a hard consonant while O is a vowel.

on the term PORTFOLIO, with the term “ON” replacing the term “PORT.” No such impression is conveyed by Opposer’s mark CARTAGIO, which merely suggests the old Latin name of Carthage.

E. Case Law

The Board and the Court have frequently held that marks which are no more alike than Petitioner’s and Registrant’s marks are not confusingly similar as a matter of law, regardless of the identity of goods. In many of these cases, the marks were even *more* alike than Petitioner’s and Registrant’s, yet no likelihood of confusion was found.

In *Keebler Company v. Murray Bakery Products*, 866 F.2<sup>nd</sup> 1386 (CAFC 1989), the Court affirmed the Board’s dismissal on summary judgment of an opposition by the owner of PECAN SANDIES to an application for registration of PECAN SHORTEES, even though both marks were used on cookies. Setting aside the descriptive word “PECAN,” the Court acknowledged that “both marks contain words that begin with an ‘s’ sound and terminate in an ‘ees’ sound....” Nevertheless, the Court agreed with the Board that SANDIES and SHORTEES were dissimilar in appearance, pronunciation and meaning, and upheld the Board’s dismissal. Of course, in this case CARTAGIO and ONFOLIO are even more distinct than the marks in *Keebler Company*, since they do not begin with the same sound. See also *Quaker Oats Co. vs. General Mills, Inc.*, 134 F.2<sup>nd</sup> 429 (7<sup>th</sup> Cir. 1943) (OATIES not confusingly similar to the famous mark WHEATIES; the owner of WHEATIES could not appropriate the diminutive suffix ‘IES’ which was already used by other makers of similar products).

In the significant case of *Polaroid Corporation v. Oculens, Ltd.*, 196 USPQ 836 (TTAB 1977), the Board found no confusing similarity between the registered mark POLAROID and the Registrant’s mark FILTEROID, even though both marks were used for sunglasses, and even

though the POLAROID mark was famous. The Board noted that the only similarity between the marks lay in the common suffix "OID," which had the standard dictionary meaning of "likeness" or "resemblance," and which appeared in a number of third-party registrations. The Board further held that the remaining portions of the marks, namely "FILTER-" and "POLAR-," did not look or sound alike or have the same connotation. In the instant case, of course, the root terms "CARTAG-" and "ONFOL-" are even more dissimilar than "POLAR-" and "FILTER-" and Petitioner's mark CARTAGIO cannot assert the fame of POLAROID.

In *Bulova Watch Company, Inc. v. Albert J. Miller*, 463 F.2<sup>nd</sup> 1376 (CCPA 1972), the Court affirmed the Board's ruling that ACCUTRON and UNITRON were not confusingly similar, even though both marks were used for watches. Adopting the Board's finding that the suffix "TRON" is a dictionary term that appears in third-party registrations of watch marks, the Court observed that "As the Board said, UNITRON and ACCUTRON just do not look alike, sound alike or connote alike." *A fortiori*, neither do CARTAGIO and ONFOLIO. *See also Magnaflux Corp. vs. Sonoflux Corp.*, 231 F.2<sup>nd</sup> 669 (CCPA 1956) (upholding Board's dismissal of cancellation action on the ground that MAGNAFLUX and SONOFLUX are not confusingly similar, even though both were used on the same goods).

Similarly, in *Cutter Laboratories, Inc. v. Air Products and Chemicals*, 189 USPQ 108 (TTAB 1975), the Board found no likelihood of confusion between STERI-FLEX and RESIFLEX, even though both were used for similar medical products. The Board noted third-party registrations of marks containing the suffix "FLEX" for similar goods and determined that

the inclusion in each mark of the term 'FLEX' may be an insufficient basis per se, upon which to predicate a holding of a likelihood of confusion...[A]lthough the "STERI" portion of Registrant's mark contains the same letters as the "RESI" portion of Petitioner's mark, the rearrangement of these letters creates a term which is distinctly different in all respects from "RESI"; and these differences are sufficient to render the marks as a whole sufficiently distinguishable so as to

preclude a likelihood of purchasers' mistakenly assuming that the products sold thereunder emanate from a common source.

*Id.* at 110-111. In this case, of course, the root terms "CARTAG-" and "ONFOL-" do not share any of the same letters, and are therefore even more distinguishable than the root terms at issue in the *Cutter Laboratories* case. As in that case, these differences are "sufficient to render the marks as a whole sufficiently distinguishable..." *Id.*

### CONCLUSION

Petitioner's argument for confusing similarity is both inaccurate and groundless.

CARTAGIO and ONFOLIO "just do not look alike, sound alike or connote alike." *Bulova*

*Watch Company, Inc. Albert J. Millar, supra.* Other than the common suffix

"-IO," the marks do not share any letters whatsoever, and are completely different in appearance,

sound, meaning and commercial impression. Registrant therefore respectfully requests that its

Motion for Summary Judgment be granted and that the Petition for Cancellation be dismissed.

Respectfully submitted,

## Finnish

### Derivational suffix

**-io** (*with back vowel harmony*)

**-iö** (*with front vowel harmony*)

1. Forms nouns from verbs or verbal stems.  
*itää to sprout -> itiö spore (of eg. mushroom, moss)*
2. Forms nouns from other nouns, adjectives, numbers or their stems.  
*tuomari judge -> tuomio judgement*  
*kaksi two -> kaksio flat (apartment) for two people*

---

## Italian

### Suffix

**-io**

1. continuation, strength
2. state, condition

---

## Latin

### Suffix

**-io** *f*, genitive **-ionis**

1. Suffix added to the stem of the perfect passive participle of a verb, to create a verbal noun indicating an

action.

### Example

Infinitive	P.P.Participle	Verbal Noun
animare	animatus	animatio
frangere	fractus	fractio

#### GOODS AND/OR SERVICES

---

**International Class:** 009

Electric and electronic apparatus, equipment and instruments and their parts therefor, for regulating and signaling, namely, guiding and navigation systems for trains, airplanes, automobiles, traffic directing systems, traffic routing systems, tracking systems, and tracking systems controlled by satellite transmission; accident memory systems comprising vehicle data recorders; engine control apparatus, namely, electronic processors adapted to monitor engine performance and provide engine control signals; flight analyzers for detecting vehicle position; tachographs; electronic

deck logs for recording vehicle operation records; satellite control apparatus; spacecraft control apparatus; electronic teaching apparatus and instruments, namely, electronic books; electrical transformers; capacitors; electrical cables and wires; electrical wire connectors; electrically lighted displays for advertising purposes; electrical circuits, namely, circuits for regulating and controlling electrical current and voltage; electronic apparatus and instruments for light current engineering, namely, high frequency transmitters; cash registers; calculators in the nature of calculation machines; automatic vending machines; electronic coin-operated mechanisms; computers; data processors; computer chips; electrical power supplies; computer cable; printed circuit boards for computers, namely motherboards, graphics boards, interface cards, and computer interface boards; data acquisition equipment and data input equipment, namely, computer monitors, computer keyboards, computer mouse, touch pads, touch screens, input display screens, datagloves, dataglasses, video monitors, bar code readers, optical character scanners, image scanners, electric touch sensitive switches, microphones, cameras; data output equipment, namely, printers, plotters, and speakers; data communications and telecommunication equipment, namely, modems, TV-decoder for computers, ISDN accessories, namely digital signal processors; computer hard disk drives, computer memory cards, magnetic tapes drives, computer CD drives, computer floppy disk drives, computer DVD drives, computer memory chips, electronic apparatus for recording, transmission or reproduction of sound or images, namely, video tape decks, audio tape decks, CD players, DVD players, CCDs, tuners, receivers, television sets, amplifiers, loudspeakers, signal processors, mixers, optical disc players, audio visual receivers, graphic equalizers; photographic projectors; image projectors for use with personal computers; apparatus for recording electrical currents and fields, namely, scannographs; NMR-tomography apparatus not for medical use; radiographic apparatus not for medical use; ultrasonic scanning apparatus not for medical use; electric and electronic modules, namely, assembled and unassembled printed circuit boards, circuit boards; electricity conduits, namely, distributions boards and boxes; electric switches; electric and electronic circuits; printed circuits; blank magnetic data carriers; computer operating system software; operating systems utility software, namely, editors, graphic user interfaces, command line interpreters, shells, and peripheral device drivers; computer software for data transmission, data acquisition, data organization, data processing, data storage, data collection, data manipulation, and data encryption; computer software for configuration and illustration of hardware and software; computer software for maintenance and/or administration of hardware and software, computer software for supervision and error-detection of hardware and software; computer software for acquisition, maintenance, storage, transmission, processing, manipulation, and destruction of data; computer software for single-player, multi-player, and network games; computer software for the transmission of data; computer software for data generation and software development; computer software for interpreting high level program language, computer software for compiling high level program language; computer software for office applications, namely, word processor, bookkeeping, accounting, and spreadsheet programs; computer aided design (CAD) software; computer aided manufacturing (CAM) software; computer integrated manufacturing (CIM) software; computer software for process and machine control, supervision, and data acquisition; computer software for computer numeric control (CNC) units; computer networking software; computer software for computer network administration; computer software for database maintenance; computer software for network-client servers, routing, firewall protection, and bridging; computer software for hardware and software protection and security, namely, access-control, password control, eye-print checking, fingerprint checking, virus detection, and virus removal; computer software for Internet access; computer software for browsing the Internet; computer software for database management; computer software for automotive control and automotive diagnostics; computer software for points of sales (POS); computer software for electronic cash systems; computer software for maintaining, servicing, installing, and repairing industrial machines and office machines; computer software for educational purposes, namely, teaching; electric and electronic apparatus, equipment and instruments and their parts therefor for weighing, measuring, testing, examining, inspecting, controlling, supervising, namely, in the field of the automotive industry, manufacturing industry, foodstuff industry, agriculture, aeronautics, astronautics, astronomy, oil refining, packaging industry, chemical refining, chemistry, medical engineering, genetic engineering, biochemistry, seafaring, research of materials, geology, electrical power engineering, electrical power distribution, chronometry, and optical systems; \_\_\_\_\_  
Dear Sirs,

We have received your Office Action below.

Please amend application serial no. 78163187 - CARTAGIO - MUS-M001-002,  
as proposed by the Examining attorney.

As for the translation of the mark, there is none, in that CARTAGIO has  
no known meaning, other than it being similar to an old Latin name of  
the city of Carthage, Tunisia.

If the office has any questions, you are invited to contact the  
undersigned at [moetteli@patent.info](mailto:moetteli@patent.info).

Respectfully submitted,
